

ROUND BUCKETS

PLASTIC

dedicated to
the food & chemical
industry

from 0,5 L to 33 L

We offer several types of plastic buckets. The buckets differ mainly in their capacity. **We offer buckets with capacity ranging from 0,5 L to 33 L.** The standard colour is white but it is possible to choose a different colour using the proposed colour palette. Of course, it is also possible to choose the colour of a lid and a handle, if they are to be plastic. The purchase orders for colourful buckets are processed in the case of an order of minimum 5-pallets. Each bucket can be supplied with a plastic or metal handle, depending on the customer's needs. With such a large spectrum of possibilities, plastic buckets can be used in many industries. First of all, they are used in the chemical industry. Here, they can be used to pack household chemicals including various types of powders and liquids but they can also serve as containers for paints, bitumen, plasters and varnishes. Moreover, the buckets are also ideal for the food industry. They are perfect to store all kinds of preserves such as: fish, fruit, vegetable salads or pickle and dairy products. The buckets can also be used to store sauces, snacks such as chips or nuts and spices. Each container is protected by a durable lid which is sealed after the load is inserted.
